

PRODUCT DATA SHEET

DRAIN MAINTENANCE

DESCRIPTION:

Drain Maintenance is a combination of bacteria and enzymes that rapidly liquefy and digest fats, oils, greases, cellulose and protein. By keeping slow or blocked drain systems and grease traps free flowing, the need for frequent cleaning is reduced.

Drain Maintenance is suitable for spraying onto floors and walls around camper toilets, pit toilets, outhouses, portable and construction site toilets, carpets & rugs, rubbish dumps and applying to other areas where waste disposal & odour problems occur. Septic tank friendly and enhances the digestion of waste matter within the septic tank.

CHARACTERISTICS:

Bacteria Type:	Five selectively chosen Bacillus Strains
Bacteria count:	106 million cfu's/ml
Colour:	White liquid
Effective pH range:	5 - 10
Effective temp range:	5 - 50°C
Shelf Life:	24 months

APPLICATIONS:

Grease Traps	Drain Lines	Bath & Shower Drains
Odour Control	Lift Stations	Compactors
Carpets & Rugs	Kitchens	Waste Collection Areas
Dog Kennels	Hard Surfaces	Dustbins

BENEFITS:

Emulsifies and digests fats, oils and grease	Enhances BOD / COD removal
Eliminates bad odours at source	Keeps drain lines clear of fats, oils & grease
Environmentally friendly	Cost effective & easy to use
