

## PRODUCT DATA SHEET

# FOAMING CONTROL (POWDER)

## DESCRIPTION:

Foaming Control is the natural solution to reduce foaming and bulking issues in wastewater treatment applications, and contains a selectively chosen bacterial blend which will reduce foaming and promote better settling of sludge, reduction of Fat Oil and Grease levels and improved oxygen transfer within aeration and settlement tanks.

## CHARACTERISTICS:

Bacteria Type:	Bacillus spore blend
Total Bacterial Count:	6 Billion cfu's per gram
Form:	Powder
Appearance:	Tan
Odour:	Mild-earthly
Effective PH. Range:	5.0 - 9.5
Effective Temperature Range:	5 - 50°C
Shelf Life:	12 Months

## APPLICATIONS:

Waste water plants  
 Activated sludge basins  
 Reactors  
 Waste Pumps  
 Oxidation ditches  
 Lift stations

## BENEFITS:

Improves settling of activated sludge  
 Reduce foaming  
 Reduces sludge build-up  
 Enhances BOD and COD removal  
 Reduces Hydrogen Sulphide  
 Eliminates bad odours  
 Breaks down FOG build-up
